Introduction

As part of Iraq's efforts to strengthen its commercial position on the international stage and provide a supportive environment for economic activity, the Iraqi Export Guide 2025 emerges as a key tool for shaping trade policies and organizing export efforts. This guide is the result of fruitful cooperation between the Ministry of Trade, represented by the Export Support Fund, in collaboration with the Federation of Iraqi Industries and the State Company for Iraqi Fairs and Commercial Services.

This guide aims to promote export awareness and encourage the private sector to explore new markets, in addition to providing essential support and guidance to exporters. It highlights available opportunities and includes valuable information for accessing foreign markets, thereby contributing to improving the quality of Iraqi products and enhancing their competitiveness.

We aspire to strengthen trade relations with global partners and achieve sustainable growth for the Iraqi economy by facilitating access to diverse investment and economic opportunities. Developing and enhancing export capacities is a shared responsibility that requires the concerted efforts of all stakeholders. Through this guide, we seek to provide a strategic framework to achieve this goal and to position Iraq as one of the leading destinations in international trade. We hope this guide will serve as a comprehensive and inspiring reference for all those involved in manufacturing and exporting in Iraq and that it contributes to building a brighter future for the national economy.

Iraqi Export Guide

It is my pleasure today to present to you the Iraqi Export Guide for the year 2024, which represents the culmination of the Ministry's efforts and our ambitious vision to strengthen Iraq's position on the global economic stage. This guide is not merely an official document; it is a roadmap toward achieving our ambitious goals in the field of exports and a significant step in enhancing Iraq's economic standing.

In light of current challenges, we find ourselves facing a unique opportunity to invest in our natural, cultural, and industrial resources, and to boost our competitive capabilities.

This guide reflects our strategy to open new horizons for expanding our export base and enhancing cooperation with new markets, which in turn contributes to supporting the national economy, creating job opportunities, and achieving sustainable development.

We believe in the importance of partnership between the public and private sectors and are working diligently to provide an environment that fosters innovation and development. Achieving a balance between economic orientation and environmental sustainability is a goal we strive to realize through our policies and initiatives.

We call on all stakeholders, both in the public and private sectors, to collaborate and work side by side to accelerate the implementation of export strategies. Let us continue together in building a prosperous future for Iraq, where our country's name becomes synonymous with quality and innovation in global markets.

Thank you all for your continued support, and let us work together for a stronger and more prosperous Iraq.

Atheer Dawood Al-Ghurairi
Minister of Trade

Vision

The guide's vision is based on establishing a foundational framework to support Iraqi exports and ensure their sustainability and continuity in the future, thereby supporting the economy — “Growing Iraqi Exports.”

Objectives

1. Establish a primary database for locally produced, exportable goods to serve as a foundation for national industry and foreign trade.
2. Facilitate access for exporters and importers to the necessary information to locate points of manufacture and production of Iraqi goods and commodities.
3. Encourage expansion in the industrial sector and the production of national goods, while stimulating productivity efficiency and providing employment opportunities for citizens.
4. Promote local products to become strong competitors in global and regional markets in order to achieve national economic growth.
5. Raise awareness of export practices through identifying Iraqi companies and factories engaged in export activities.
6. Promote factories and companies operating in the export sector by connecting them with global markets, with the aim of raising awareness of Iraqi products among international buyers and showcasing Iraq's capabilities.

Conclusion

With pride and reverence, we conclude this guide, which stands as a shining milestone in the journey of Iraqi exports. It truly reflects the spirit of national cooperation between the Export Support Fund and its strategic partners: the State Company for Iraqi Fairs and Commercial Services, the Private Sector Development Department, and the Iraqi Federation of Industries.

This guide is the fruit of sincere collective effort, intended to serve as a practical reference for industry and export pioneers in Iraq, and as a testament to the capability of our national institutions when efforts align and visions unify.

We view this accomplishment as the beginning of a new phase for the Iraqi economy—where ideas evolve into projects, projects into products, and products into exports that raise Iraq's name high in international trade arenas.

We extend deep appreciation to all who contributed to the preparation of this guide, with special thanks to the partners who believed in this national initiative and helped make it a success. May this work be the seed for even greater projects, and may the year 2025 mark a turning point in the history of Iraqi exports.
