Nutrition for Healthcare

ABOUT US

For 15 years, we have been working for vulnerable populations

Our ultimate goal is to contribute to the mission of accessible and sustainable adequate nutrition, particularly in regions facing humanitarian crises.

At B&C International, we offer localized solutions to the global nutrition problem with our extensive experience, products that meet standards, and continuous investment in research and development activities.

Our mission

We are committed to making a positive impact on the world by providing vulnerable communities access to nutritious foods. Our goal is to create innovative, high-quality, affordable, sustainable products to help end malnutrition in areas of need. We believe everyone deserves access to healthy and nourishing food and are dedicated to making that a reality.

Our vision

Our vision is grounded in the fundamental belief that every person should have equal access to nutritious food to lead a healthy life. We strive to be at the forefront of this mission, using the latest R&D and technology to create products that are both effective and affordable for all. Our dedication is steadfast as we continue to develop new and innovative ways to address the root causes of malnutrition. By empowering communities and implementing sustainable solutions, we can work towards ending malnutrition and creating a brighter future for everyone.

OUR SERVICES

We develop products with high nutritional value and support their delivery with strategic logistics

We develop products with high nutritional value in accordance with international quality standards and contribute to the aid activities carried out by humanitarian organizations in regions facing hunger crises.

We offer our location advantage, supported by our integrated logistics capabilities, to aid organizations in ensuring the urgent transportation of our products to crisis regions.

OUR PRIORITIES

We offer high-quality products and aim for maximum efficiency

To achieve this, we take an integrated approach that starts with our supplier network, includes our production technologies and processes, and is supported by our logistics services. We are supplying top-quality products that meet the demands of those who rely on us.

Highest quality

The highest quality meets unique needs by utilizing all the possibilities of innovative and advanced technologies.

Logistics solutions

Our experience in the logistics industry ensures that our products are delivered through seamlessly integrated services.

Teamwork

Our team is focused on achieving corporate goals through effective teamwork and a culture of continuous development.

Social impact

We strive to maximize the impact of our activities on social development in communities facing malnutrition through local collaborations.

OUR FACILITIES

Storage for high production capacity

At B&C International, we pride ourselves on our high production and storage capacity. Our facilities are built on a total area of 2,000 m², including 1000 m² of storage area, and we have a production capacity of up to 12 MT/per day. Additionally, our expert team, serving in our 500 m² office area, can offer end-to-end solutions worldwide with the projects they have developed. With our extensive storage capabilities, we can keep up to 1000 MT of raw materials and ready-to-ship products on hand at any given time.

CLEAN ROOM AND PACKAGING

Development, production and packaging with the most advanced technologies

High standards

Clean room with a total area of 750 m², ISO 8 classification and advanced technology.

Innovative R&D

Innovative solutions that meet unique needs, focusing on the development of our processes and products.

Sustainability

Sustainable packaging solutions that ensure food safety, hygiene and optimum shelf life with carefully selected materials.

OUR TEAM

Expertise for sustainable development

Our professional team is dedicated to combining expertise and experience to ensure that we always deliver the best possible products and services. We believe that expertise is essential in every aspect of our business, from organizational structure to corporate culture, human resources to production and R&D studies, raw material supply, and logistics solutions. We are always striving to improve ourselves and our products in light of scientific and technological advances. We believe that development is a condition of expertise, and we encourage a culture of continuous improvement among our employees.

OUR APPROACH

Quality planning, assurance, control, and continuous improvement

At B&C International, we are committed to providing our customers with only the best quality products that are accessible to all. We believe that achieving such high standards is only possible through a comprehensive and integrated production process that prioritizes quality and safety at every step.

1

Process Development

We focus on developing indigenous products required by needs and conditions.

2

Production Management

We work with reliable suppliers that meet our quality standards.

3

Management Control Procedures

With the goal of continuous improvement, we closely monitor all our production processes.

4

Strategic Logistics

We ensure a seamless delivery of our final product.

OUR PRODUCTS

High nutritional value, quality, sustainable and accessible products

Aspiring to solve the problem of malnutrition in communities around the world, B&C International creates safe and nutritious food products for people in need, and collaborates with humanitarian organizations to support their efforts.

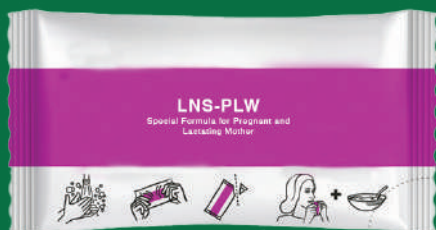

We are constantly developing new formulas, while working closely with our partners to understand their expectations, and incorporating their feedback into our product development activities.

Products adapted to specifications

B&C International is committed to developing nutritious foods that guarantee quality and safety to meet the nutritional needs of the target audience.

We develop culturally sensitive products that are easy to transport and adapted to our end users' specific needs.

Special Formula for Pregnant and Lactating Mothers (LNS-PLW)

For moderately acute
malnourished pregnant
and lactating women.

Ready-to-Use Supplementary Food (RUSF)

For moderately acute
malnourished children
aged 6 months and above.

Ready-to-Use Therapeutic Food (RUTF)

For the therapeutic treatment
of children aged 6 months
and above with severe acute
malnutrition.

QUALITY

Comprehensive approach to quality management systems

At B&C International, our approach to quality encompasses all aspects of our procurement, product, production, and distribution processes. We believe that our commitment to meeting international standards is just the beginning. We are always striving to push ourselves further and innovate within our industry, setting the standard for tomorrow's quality benchmarks.

Continuous monitoring through internal and external audits

We use data-based scientific methods to monitor our systems and subject them to periodic audits, both internally and externally. This is all part of our commitment to maintaining our quality certificates.

Quality systems open to innovation and development

We are always monitoring the latest scientific, technological, and sectoral innovations to make sure that our quality system remains up-to-date and effective.

Our quality certificates

B&C International maximizes its standards with certifications covering the production, packaging, storage and distribution of SNF products following Good Manufacturing Practices (GMP) and Hazard Analysis and Critical Control Points (HACCP) principles. It produces within the scope of FSSC 22000 certifications as per below and further aligns its activities with ISO standards to fortify our commitment to excellence and compliance.

We manage safety with FSSC 22000 assurance

FSSC 22000, a globally recognized Food Safety Management System that covers the requirements of ISO 22000 and ISO/TS 22002-1 standards designed specifically for the food industry, provides a comprehensive framework that includes hazard analysis, operational prerequisite programs, and effective and rigorous verification processes.

We believe that our customers deserve nothing but the best, which is why we subject all of our products and services to rigorous quality assurance procedures. Our commitment is reflected in our Policies. We believe that by adhering to these policies, we are able to provide our customers with the highest quality and most secure products and services possible.

SUSTAINABILITY

Belfante & Catoni International Sustainability Policy

We strongly believe that sustainability should be at the core of all corporate activities. As an integral part of all the processes we undertake, we continually monitor and audit the explicit targets we have set within the framework of our sustainability policy. We report the outputs we obtain at specific intervals to ensure that we are meeting our sustainability goals.

United Nations Sustainable Development Goals

We believe it is our responsibility to clearly and unequivocally express our commitment to the United Nations Sustainable Development Goals (SDGs) and integrate these common goals for humanity into all of our operations.

Our ultimate aim is to shape the future by minimizing our environmental impact and carbon footprint, as well as by creating a positive social impact through our activities.

We use renewable energy

As part of our commitment to sustainability, we have taken steps to use renewable energy sources in our production facilities.

We now operate with solar panels to generate the electricity we need, which reduces our dependence on fossil-based energy sources. By doing so, we hope to contribute to the fight against climate change and minimize our carbon footprint.

**2000 m²
Solar Panels**

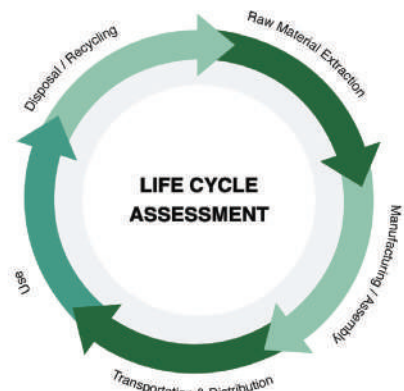

**6000 MT / annual
Production
Capacity**

Life-Cycle Assessment

As a company, we also commit ourselves to applying the Life - Cycle Approach.

LCA is a process of evaluating the effects a product has on the environment over the entire period of its life thereby increasing resource-use efficiency and decreasing liabilities.

We are dedicated to identifying, quantifying and evaluating the environmental loads involved and reducing their environmental impacts.

Sustainability is a fundamental principle that guides everything we do.
