INVITATION

The Islamic Organization for Food Security (IOFS), in cooperation with ExpoGroup International Exhibition Company LLP and with the support of the Ministry of Agriculture of the Republic of Kazakhstan, is pleased to invite you to participate in KazAgroFarm 2026, one of the largest international agricultural exhibitions, **to be held from 21 to 23 October 2026 at the EXPO International Exhibition Centre in Astana, Republic of Kazakhstan**

In 2026, for the first time, KazAgroFarm will feature an OIC Food Security Pavilion, designed to bring together representatives of the agrifood business community, investors, importers, and industry experts from the Member States of the Organisation of Islamic Cooperation.

The Pavilion will serve as the first practical step towards implementing Resolution No. IOFS/2026/7GA-11, adopted by the IOFS Member States at the 7th General Assembly of the Islamic Organization for Food Security, held on 13–14 May 2026 in Astana, Republic of Kazakhstan, which provides for the organization of the inaugural Global OIC Food Security Expo in 2027.

The initiative aims to establish a new annual international platform for promoting agrifood trade, attracting investment, facilitating technology exchange, establishing direct business contacts, and strengthening long-term cooperation in the field of food security among OIC Member States.

The main areas to be showcased within the Pavilion will include:

- the export and investment potential of the agrifood sectors of OIC and IOFS Member States;
- manufacturers and suppliers of agricultural machinery, equipment, and advanced agrotechnological solutions, including irrigation systems, automation, digital monitoring, storage, processing, and logistics technologies;
- producers and exporters of food products in demand across OIC markets, including grains, oilseeds, meat and dairy products, processed foods, and certified halal products;
- agrifood companies seeking to enter OIC markets and expand their international business partnerships;
- cooperation opportunities with importers, investors, distributors, and business associations from the Gulf countries and other OIC Member States;
- innovative technologies and solutions for food production and processing, warehousing and cold-chain infrastructure, logistics, digitalization, resource efficiency, sustainable agriculture, and other related areas.

B2B meetings and a thematic session dedicated to trade, investment, and technological cooperation between Kazakhstan and OIC Member States are also planned.

PARTICIPATION FEES

- Provision of exhibition space;
- Providing the technical requirements of the BMCA exhibition center operator;
- Providing contacts of accredited contractors or allowing participants to select their own contractor;
- Consulting support on organizational issues.

AGRICULTURAL POTENTIAL OF KAZAKHSTAN

Kazakhstan ranks among the world's leading countries in terms of agricultural land area and has significant potential to expand the production and export of food products.

Crop Production

The total area of agricultural land in Kazakhstan is approximately 223 million hectares, including around 183 million hectares of pastureland. The total sown area in 2026 is expected to reach approximately 29 million hectares. Kazakhstan is the largest grain producer in Central Asia. In 2025, the country harvested more than 25.9 million tonnes of grain, while the area under oilseed crops reached approximately 3.3 million hectares.

Livestock Production

Kazakhstan's livestock population includes: approximately 8.4 million head of cattle; more than 22.8 million sheep and goats; approximately 4.2 million horses; more than 46 million poultry. Particular attention is being given to the development of dairy farming. Kazakhstan currently has around 70 modern dairy farms in operation, with more than 45 additional facilities under construction.

Export Potential

Kazakhstan actively exports grain, meat, dairy products, oilseeds, and other agricultural products. Its main export destinations include the CIS countries, China, Türkiye, the European Union, and Central Asian countries.

ABOUT KAZAGROFARM

The KazAgroFarm exhibitions provides unique opportunities for:

- establishing business contacts;
- identifying potential buyers, suppliers, and investors;
- exchanging professional experience;
- presenting new technologies and equipment;
- promoting agricultural products;
- concluding agreements and developing long-term cooperation.

KazAgro is Kazakhstan's largest crop-production exhibition, covering the entire production cycle—from seed breeding and production to finished products, modern technologies, equipment, and solutions for the production, storage, processing, and transportation of agricultural products.

KazFarm is Kazakhstan's only specialized exhibition covering livestock farming and the meat and dairy industries. It encompasses all areas of the sector, from animal genetics and breeding to the production, processing, storage, and marketing of finished products.

The two exhibitions are held simultaneously at the same venue, bringing together two major areas of agriculture and creating a synergistic effect for exhibitors, visitors, and business partners.

For 17 years, KazAgroFarm has been one of the largest agricultural exhibition platforms in the CIS. The event is held with the official support of the Ministry of Agriculture of the Republic of Kazakhstan. Each year, the exhibitions are attended by government officials, members of Parliament, ministers and vice-ministers, heads of international organizations, ambassadors, business representatives, and industry experts. KazAgroFarm 2026 will feature national pavilions from Germany, France, Canada, the Netherlands, Spain, Russia, Belarus, China, and other leading agricultural countries.

More than 300 companies from over 25 countries are expected to participate. The total exhibition area will cover approximately 20,000 square metres.

The exhibitions traditionally feature a comprehensive business programme, including presentations, thematic sessions, business missions, B2B meetings, demonstrations of new technologies, livestock auctions, and the signing of memoranda and commercial agreements between Kazakh and international companies.
