The Loading Master Course is specifically structured to give attendees an all-encompassing understanding of maritime cargo handling and loading operations and practical expertise in the subject matter. By imparting knowledge on cargo loading, stowage, and safety protocols, this course equips trainees with the knowledge and skills necessary to succeed as a Loading Master in the maritime industry.  Upon successful completion of the Loading Master Course, participants should be able to:  • Understand the roles and responsibilities of a Loading Master in maritime shipping.  • Safely and efficiently plan, supervise, and execute cargo loading and unloading operations.  • Ensure compliance with international maritime regulations and industry best practices.  • Identify and manage risks associated with cargo handling and stowage.				ips uld ne الأهداف:
